

HIGHWAYS ENGLAND UPDATES

A14 and M11 essential works

Our contractors Balfour Beatty are continuing to make good progress on our A14 and M11 programme of essential works. The majority of works are being carried out as planned. Over the past week the A14 J31 – 34 central reservation barrier works have progressed well, and are on scheduled to be completed in late April.

The parapet replacement on Huntingdon Road bridge is also progressing well and we expect to remove the temporary edge protection next week as planned. We have also installed a 24/7 lane one closure on the A428 WB to facilitate repairs to the embankment and improve the access to the bridge bearings.

Over the next few weeks we are working very closely with Costain who have some work to complete between junctions 31 and 32. We are combining our traffic management so that as much work as possible can be completed in each closure which minimises the impact of the work on the travelling public

A14 junctions 31 to 34 central barrier: speed restriction

A 40 mph restriction has been put in place so we can carry out work on the central reserve barrier.

This work is too extensive to carry out in a single night. And while work is being carried out the barrier won't meet safety standards if struck by a vehicle driving at the national speed limit.

To keep you safe we have therefore reduced the speed limit. We've put out black and yellow signs to explain this too.

Current schedule

Here's the current schedule of works that Balfour Beatty are carrying out on behalf of Highways England. Remember schedules may change at short notice, for example due to bad weather.

| | A1307 embankment and bridge repairs | Earthworks and bridge repairs | No diversion required. |

| | | | |
|------------------------------------|--|--|--|
| Continuing on until late May | | | |
|------------------------------------|--|--|--|

Thank you for signing up to stay informed about the A14 and M11 Essential works. We'll do our utmost to complete these works quickly, avoid disturbance and keep noise to a minimum.

Once complete, the work will result in a smoother and safer A14, better bridges, and clearer directions to Addenbrookes Hospital.
